Differences between High School and College

| IN HIGH SCHOOL | IN COLLEGE |
|---|--|
| High school is mandatory and usually free. | College is voluntary and expensive. |
| Time is structured by school officials and parents. | Students manage their own time. |
| Students can count on teachers to remind them of | Students balance responsibilities and set priorities on their |
| responsibilities and to guide them in setting priorities. | own. |
| Daily classes follow one after the other, with a few | Students often have large time gaps between classes; class |
| minutes in between. | time varies from day to day. |
| Most class schedules are arranged by school personnel. | Students arrange their own schedule in consultation with their academic counselor or advisor. |
| Students are told about graduation requirements. | Graduation requirements are complex, differ from program to |
| Otadente die told about graduation requirements. | program, and sometimes from year to year. Each student is |
| | expected to know those that apply to him/her. |
| Bottom Line: School personnel watch out for students | Bottom Line: Students are expected to take responsibility for |
| guiding and correcting them if necessary. | what they do and don't do, as well as for the consequences |
| | of their decisions. |
| HIGH SCHOOL CLASSES | COLLEGE CLASSES |
| Students can normally get by with studying outside of | Students need to study at least 2 to 3 hours outside of class |
| class as little as 0 to 2 hours a week, and perhaps | for each hour in class. A course load of 12 credits requires |
| cramming before tests. | anywhere between 24 to 36 hours of independent |
| Booding is often to tought in class: listening in class is | study/homework time. |
| Reading is often re-taught in class; listening in class is sometimes enough. | Students are assigned substantial amounts of reading and writing which may not be directly addressed in class, but still |
| Sometimes enough. | show up in tests. |
| Bottom Line: Students are usually told in class what | Bottom Line: It's up to the students to read and understand |
| they need to learn from assigned readings. | the assigned material; lectures and assignments proceed |
| , | from the assumption that the students have already done so. |
| HIGH SCHOOL TEACHERS | COLLEGE PROFESSORS |
| Teachers check completed homework. | Professors may not always check completed homework, but |
| | they will assume the students can perform the same tasks on |
| | tests. |
| Teachers remind students of incomplete work. | Professors may not remind students of incomplete work. |
| Teachers approach the students if they believed they | Professors are usually open and helpful, but most expect the |
| need assistance. | students to initiate contact if they need assistance. |
| Teachers are often available for conversation before, during, or after class. | Professors expect and want the student to attend their scheduled office hours. |
| Teachers are taught teaching methods to assist in | Professors have been trained as experts in their particular |
| imparting knowledge to students. | areas of research, not necessarily on how to teach. |
| Teachers provided students with information if case of | Professors expect students to get from classmates any notes |
| an absence. | from missed classes. |
| Teachers present material to help students understand | Professors may not follow the textbook. Instead, they may |
| the material in the textbook. | use other materials to supplement the text; or they may |
| | expect the students to relate the classes to the textbook |
| | readings. |

| Teachers often write information on the board as a summary of notes. | Professors may lecture nonstop, expecting students to identify the important points in their notes. Good notes are a must. |
|--|---|
| Teachers impart knowledge and facts, sometimes drawing direct connections to lead students through the thinking process. | Professors expect students to think about and synthesize seemingly unrelated topics on their own. |
| Teachers often take time to remind students of assignments and due dates. | Professors expect students to read, save, and consult the course syllabus (outline); the syllabus spells out exactly what is expected of the student, when it is due, and how it will be graded. |
| Teachers carefully monitor class attendance. | Professors may not formally take roll, but they are still likely to know whether or not a student shows up. |
| Bottom Line: In high school students mostly acquire facts and skills. | Bottom Line: In college students are responsible for thinking through and applying what they have learned. |
| TESTS IN HIGH SCHOOL | TESTS IN COLLEGE |
| Testing tends to be frequent and covers small amounts of material. | Testing is usually infrequent and may be cumulative, covering large amounts of material. The student, not the professor, need to organize the material to prepare for the test. A particular course may have only 2 or 3 tests in a semester. |
| Makeup tests are often available. | Makeup tests are seldom an option; if they are, the student needs to request them. |
| Teachers are open to rearranging test dates to avoid conflict with school events. | Professors in different courses usually schedule tests without regard to the demands of other courses or outside activities. |
| Review sessions pointing out the most important concepts are common. | Professors rarely offer review sessions, and when they do, they expect the students to come prepared with questions. |
| Bottom Line: Mastery can be seen as the ability to reproduce what students are taught. | Bottom Line: Mastery is often seen as the ability to apply what the student has learned to new situations or to solve new kinds of problems. |
| GRADES IN HIGH SCHOOL | GRADES IN COLLEGE |
| Grades were given for most assigned work. | Grades may not be provided for all assigned work. |
| Extra credit projects are often available to help raise your grade. | Extra credit projects cannot, generally speaking, be used to raise a grade in a college course. |
| Students may graduate as long as they pass all required courses with a grade of D or higher. | Students graduate only if their average in classes meets the departmental standard specified in the Catalog. |
| Bottom Line: "Effort counts." Courses are usually structured to reward a "good-faith effort." | Bottom Line: "Results count." Though "good-faith effort" is important in regard to the professor's willingness to help students <i>achieve</i> good results, it will not <i>substitute</i> for results in the grading process. |
